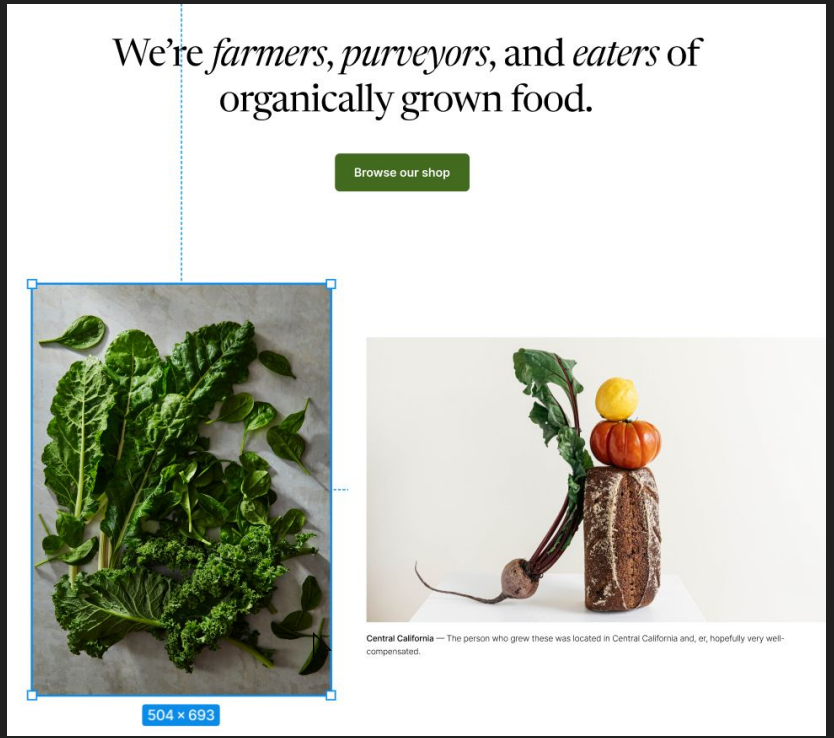
Inspiration

Figma! Intuitive tools allow for users to easily create visuals

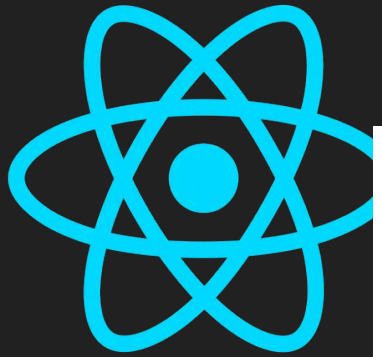
- Low skill floor required
- Perfect for anyone getting into design

What if websites could be designed with such ease?

Any user should be able to create a website without great hassle

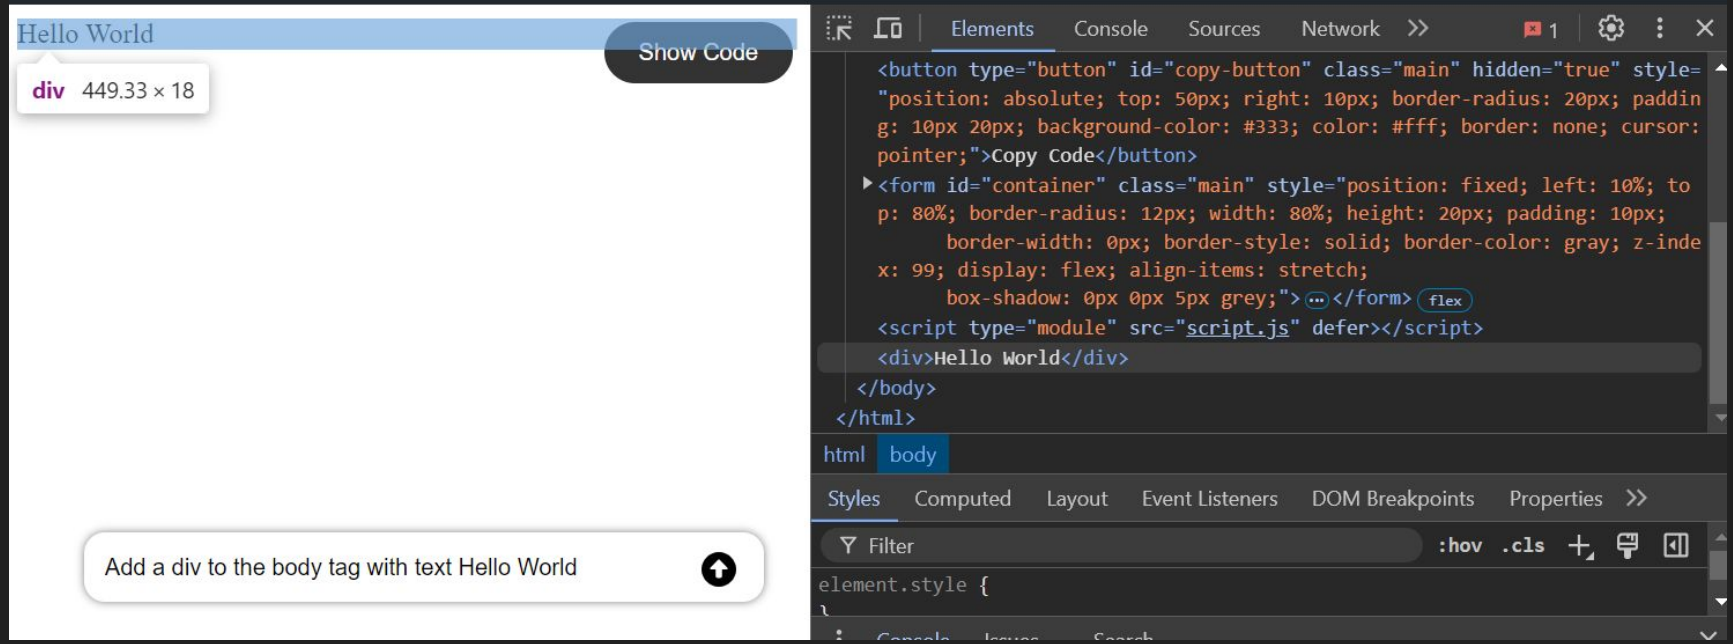


Other Options



While powerful in the hands of experienced users, those with less experience may struggle with the complicated UI these two services present.

Our Product: Applications and Limitations



Possible Future Development

- Timeline of events

- Create a element manager to control structure with which elements are being added and allow users to preview changes

- Allow third-party API integrations to add further layer of application
